

Nirvana Solutions is a financial technology and services provider that delivers integrated and modular front, middle and back office solutions to a wide array of financial firms, including hedge funds, asset managers, CTA's, prime brokers and fund administrators. Our offering is bundled with a robust data management service where our team can handle middle and back office operations including data aggregation, security master management and reconciliation on behalf of our clients. Our cloud based, modular architecture allows clients to license and customize a solution set that fits their needs, with or without replacing existing systems, at an affordable price. The result is an end to end solution offered at one of the lowest total cost of ownership in the industry.

Cloud Based

Centralized data storage with online access to solution set. Views into aggregated real-time data across multiple counterparties, asset classes, funds, and strategies. Everything you need to run your business in a single secure location.

Fully Managed

Delivered as a true fully hosted service offering with mobile accessibility, 24-hour client support, and no dedicated technology resources needed.

Streamlined

Automated front-to-back office operations with straight through processing to simplify operations.

Integrated

Seamless connectivity with all global 3rd party networks: custodians, prime brokers, executing brokers, fund administrators, and third party applications.

Cost Effective

Mitigate costs associated with maintaining an IT infrastructure, using technology consultants, and hiring additional operational staff. Nirvana clients realize an average cost savings of 40% when working with us VS vendor solutions.
